

HL4Y Alkaline Water vs. Reverse Osmosis Water

HL4Y Alkaline Water instantly...Magically Changes your ordinary tap water into... Purest – Filtered - Mineral Rich – Highest Anti- Oxidant - Alkaline Energy Water...That Naturally...BOOSTS YOUR IMMUNE SYSTEM...for a more Energized and Healthier You!

The *HL4Y Alkaline Water Machines* are a new breakthrough in technology that produce positively and negatively charged water that can be used for healthy drinking water, and for cleaning purposes. The process is called electrolysis, whereby water flows across electrically charged plates. The process changes the structure of the water molecules and produces oxygen rich water. The water can be made to be alkaline (for internal use) or acidic (for external use).

Benefits of the HL4Y Alkaline Water Machines

1. The alkalescency (the quality of being alkaline) of the water helps dissolve acids, eliminates toxins, and boosts immunity against bacteria and viruses.
2. The negatively charged or ionic water acts as an antioxidant that fights free radicals.
3. The breakdown of H₂O into smaller clusters through alkalization makes water in the blood more quickly absorbed by the cells in the body.
4. Essential elements and trace minerals found in the water are also dietary supplements and strong antioxidants.
5. High alkaline and oxygen levels in the water greatly increased cell hydration which pushes out toxins and causes detoxification at the deepest cellular level. The high oxygenation can also improve sleep, mental clarity and increase energy.

6. Alkaline water helps prevent acid build-up, fights fatigue, and improves sleep.
7. Alkaline water possesses antioxidants, anti-aging agents and acid scavengers that boost the immune system.
8. Drinking Alkaline Water increases your blood oxygen levels which raises the pH of your body which greatly enhances your health by helping with:

- Obesity
- Diabetes
- Arthritis
- Joint Pain
- Acid Reflux
- Fibromyalgia
- Lupus
- Cancer
- Candida
- Bad Skin
- Fatigue
- Gout
- Psoriasis
- Heart Disease
- High Blood Pressure
- High Cholesterol
- Water Retention
- Ulcers

Diseases All Acidic Related

These diseases are all acidic related and Alkaline water will neutralize acids and balance your body so it operates more efficiently by; Raising Energy Level, Relaxing Muscle Tension, Reducing Sore Joints, Accelerates Absorption of Nutrients and Digestion as well as improving Blood Circulation for increasing all of Bodies Fluids, Cellular Messages and especially increasing Oxygen in all cells and tissue of the body.

"Peak performance and optimal health depend on the body's ability to maintain a slightly alkaline state in virtually all of our cells and tissues... Drinking four to six glasses of alkaline water a day will help to neutralize over acidity and over time will help to restore your buffering ability.

Reverse Osmosis...The Worst Water You Can Drink

Reverse osmosis water is 95% Dead Water and is very harmful to your body and is very wasteful:

- Reverse osmosis filter (RO) removes over 95% of natural minerals that are healthy to human body.
- Adults can become sick from drinking reverse osmosis water after a few months due to the lack of minerals. Children should never drink reverse osmosis water because the lack of trace mineral elements will effect their growth.
- Reverse osmosis decreases the pH of tap water and makes it more acidic (pH below 6.2).
- Therefore, our body will pull minerals from other areas of our body, such as our bones and teeth to neutralize this abundance of acid. Reverse osmosis water causes the loss of the calcium in our body.
- The over abundance of acid increases our risks of disease. This is because free radicals increase when our bodies aren't as alkaline as they should be. These free radicals are what lead to disease and aging.
- Reverse osmosis is a very slow process that needs a holding tank and so very limited to how much water to produce everyday and 4 gallons or more are wasted down the drain for every gallon of RO produced. This not only takes up valuable space but holding tanks also pose a risk of bacteria growth as pure water is stored at room temperature.
- Reverse osmosis purification produces tasteless, dead water.
- Reverse osmosis is large cluster water.
